

Crittenden County Farm Products Guide

The Crittenden County Extension office is compiling a list of farm products produced locally that will be handed out to the public. The list can include farm products from vegetables, fruit, meat, bedding plants, mums, and hay. This will be for farm products that are produced in Crittenden County only. Our plan is to publish a quick list for 2020 that will be updated regularly and starting in January of 2021 we would update the list yearly. Just fill out the form below and return it to the Crittenden County Extension Office. You may mail the form to the address listed below, use the drop box behind the office or message the office on the Facebook page. Please return by **May 26, 2020**. For more information contact:
